Device management platform
One solution for all stakeholders

Transforming the digital classroom or library
into your greatest learning resource.

TLC's comprehensive device management platform caters to the needs of every stakeholder in the child's learning cycle. TLC establishes a true learning partnership between home and school, while streamlining and expanding mobile device access and management. Community Resources can be shared through the library while protecting your investment.

TLC Simplifying education device management

Educators/Librarians

Maximize precious teaching time and make the digital classroom work for you.

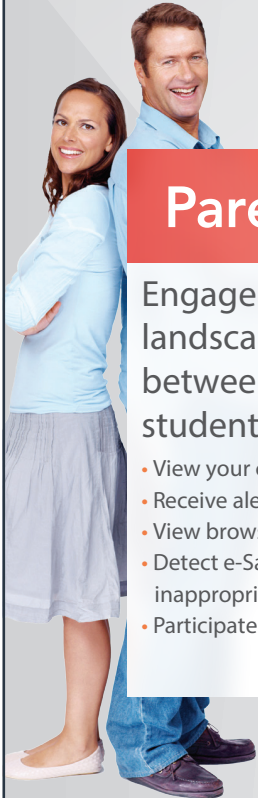

- Focus learning by locking and remotely controlling student screens
- Broadcast teacher screen, and showcase selected student screens
- Monitor real-time thumbnail views of student screens
- Block vetoed web pages and apps
- Assess learning benchmarks with quizzes and tests
- Engage collaborative learning with interactive whiteboard and in-class chat
- Send and receive docs, respond to raised hand icons

IT Professionals

Centrally manage and support from the comfort of your web console – device and platform agnostic.

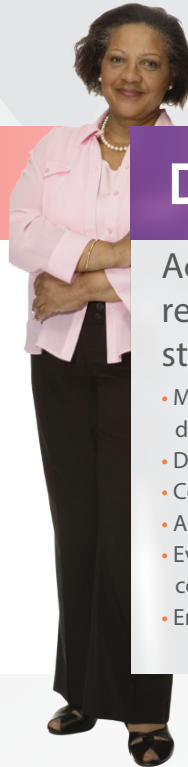

- Provide remote, web-based assistance, work alongside or take screen control
- Centrally manage device settings, apps and policies
- Streamline software distribution and updates
- Secure and track devices with locking anti-theft module
- Achieve proactive and effective monitoring via alerts
- Easily produce detailed usage reports
- Group and tag devices according to pre-defined criteria
- Provision groups of devices for standardized testing lockdown

Parents

Engage with your child's online landscape and close the cyber gap between parents, teachers and students.

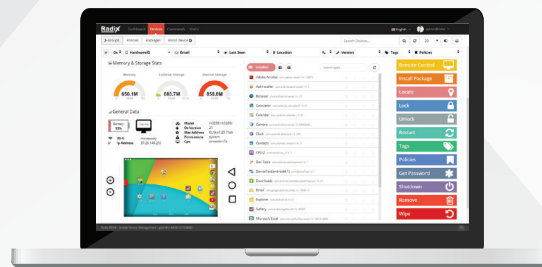

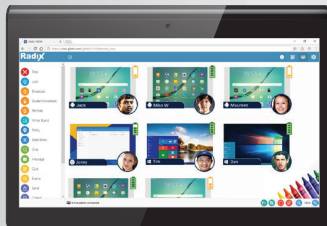

- View your child's screen remotely, in real-time
- Receive alerts on device misuse
- View browsing history and app use
- Detect e-Safety concerns, cyber bullying or inappropriate language
- Participate in your child's education

Directors

Access high resolution management reports that support your evaluation strategy and qualify decision making.

- Monitor technology usage and operation: Nationwide, districtwide, schoolwide
- Determine device usage patterns with big data analytics
- Centrally monitor all roaming devices
- Access clear performance diagnostics and ROI indicators
- Evaluate performance reports to minimize resource consumption
- Empower your teachers and enhance student productivity

Specifications Snapshot

- Robust cloud-based system
- Enhanced screen sharing engine
- Online and offline capabilities
- Low internet/network footprint
- Native code service for different operation systems
