

TLC SmartCLASS

Tablet Classroom Management Software

TLC SmartClass powered by Radix, an award winning classroom management software, is now optimized for Android, Windows and iOS devices.

TLC SmartClass enables teachers and librarians to effectively manage activities, enrich the learning experience and keep a finger on the classroom or library pulse.

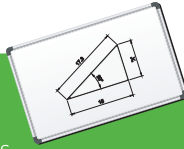

TLC SmartClass transforms student devices into a rich 21st century learning environment. Students easily connect their tablets or other devices to the classroom or library Wi-Fi network, while the teacher or librarian stays in control using a single dashboard.

“ With **TLC** SmartClass my students share a truly interactive and enriched learning experience. ”

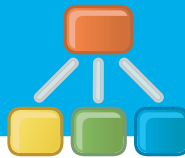

Demonstrate

- Broadcast teacher's screen to 60+ students
- Broadcast HD quality video to all student devices
- Present a selected student's screen to class
- Share an interactive whiteboard, enabling live collaborative class work
- Apply on-screen annotations in real-time to shared screens

Manage

- Install applications remotely
- Turn student devices on/off and save attendance list
- Password protect teacher or librarian control and student applications
- Remotely set, configure and enforce all student device settings centrally

Technology

- Peer-to-peer: No server required
- Small network footprint and minimal device resource consumption

Teach

- Take full remote control of student device for assistance
- Assess students' understanding through quizzes and tests
- View student raised hand icons to discreetly assist students who most need help
- Allow in-class chat and discussion either in groups or pairs
- Apply live lesson planner to create and execute pre-planned lesson agendas

Monitor class activities

- View a slideshow of students' full screens
- View thumbnails of students' screens
- View all running applications, devices and battery status

Focus students on task

- Lock student screens for attention
- Block Internet and selected applications
- Display messages on student screens
- Open and co-browse, PDF files, web-pages and e-books with students
- Send and collect files

Standardized testing or Kiosk mode

- Create device policies, applied centrally and on the fly
- Show only selected apps, locking and hiding unselected apps
- Set the background image according to different policies
- Disable hardware components, external USB usage, app installations etc.
